## Low Water Cut-Offs

### Combination Low Water Cut-Off/Pump Controllers for Steam Boilers

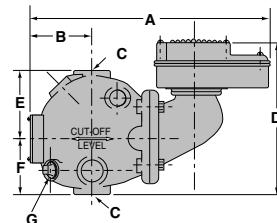

#### Series 42S

#### Low Water Cut-Off/Pump Controllers

- For residential, commercial, and industrial low and medium pressure steam boilers with a separate water column
- For boilers of any steaming capacity
- Monel bellows provides corrosion resistance
- Single pole, single throw snap action switches
- Enclosed junction box protects switches
- Optional features
  - Quick hook-up fittings
  - Gauge glass connector
- Maximum pressure 50 psi (3.5 kg/cm<sup>2</sup>)

SERIES 42S

#### Electrical Ratings

Voltage	Pump Circuit Rating (Amperes)		Pilot Duty
	Full Load	Locked Rotor	
120 VAC	7.4	44.4	345 VA at 120 or 240 VAC
240 VAC	3.7	22.2	

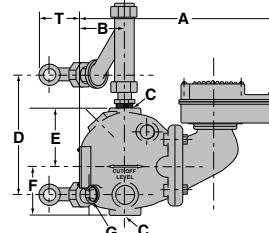

Alarm Circuit Rating (Amperes)	
Voltage	Amps
120 VAC	1
240 VAC	1/2

## Low Water Cut-Offs – Mechanical For Steam Boilers

### Series 150S Low Water Cut-Off/Pump Controllers

- For commercial and industrial low or high pressure boiler applications
- For boilers of any steaming capacity
- Monel bellows provides corrosion resistance
- Snap action switches for high temperature service
  - 1 Single pole, single throw switch for pump control
  - 1 Single pole, double throw switch for low water cut-off and alarm actuation
- Optional features
  - Manual reset
  - 2 Single pole, single throw switches
  - 2 Single pole, double throw switches
  - Float block
  - BSPT threads
- Maximum pressure 150 psi (10.5 kg/cm<sup>2</sup>)

Series 150S

### Model 150S-MD

#### Maximum differential operation

- Prevents nuisance burner shutdowns in **low pressure** applications operating less than 50 psi (3.5 kg/cm<sup>2</sup>)
- For additional information see page 46

## Low Water Cut-Offs – Mechanical For Steam Boilers

### Series 157S

#### Low Water Cut-Off/Pump Controllers

- For residential, commercial and industrial low or high pressure boiler applications
- For boilers of any steaming capacity
- Monel bellows provides corrosion resistance
- Float chamber with integral water column provided
- Snap action for high temperature service
  - 1 Single pole, single throw switch for pump control
  - 1 Single pole, double throw switch for low water cut-off and alarm actuation
- Optional features
  - Manual reset
  - Integral conductance probes for additional levels and greater operating differential-Model 157S-RBP-MD
  - 1" or 1 1/4" NPT equalizing tappings
  - 1/2" or 3/4" NPT tappings for gauge glass/tri-cock installations
  - BSPT threads
- Maximum pressure 150 psi (10.5 kg/cm<sup>2</sup>)

### Model 157S-MD

#### Maximum differential operation

- Prevents nuisance burner shutdowns in **low pressure** applications operating less than 50 psi (3.5 kg/cm<sup>2</sup>)
- For additional information see page 46

## MD Model Setpoints

The bellows on the 150 units are sensitive to pressure. At higher pressures the bellows is stiffer requiring more force to move it. At lower pressures the bellows is more pliable (less stiff) requiring less force to move it. Consequently, the on/off points tend to narrow at lower pressures. (Less distance between on and off).

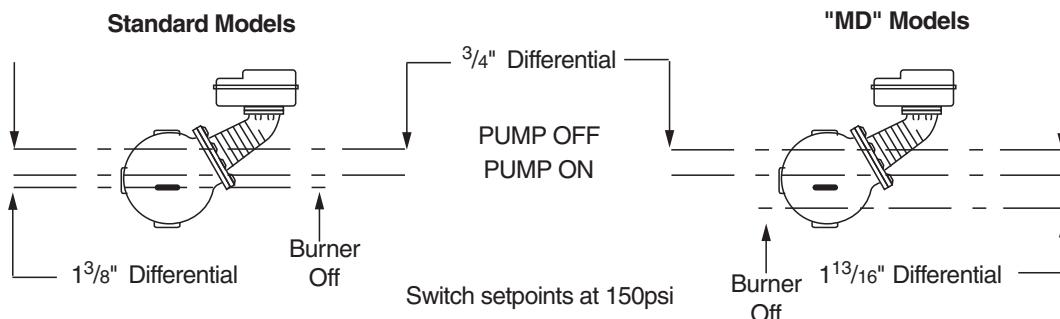

Early versions of the 150 units with mercury bulb switches were able to be adjusted. These units had knurled adjustment screws that could be used to raise, lower or widen the setpoints. Although the available adjustment was small (usually  $\frac{1}{16}$ " to  $\frac{1}{8}$ " total), it was enough to compensate in the field for lower pressure systems.

Later versions of the 150 with mercury bulb switches and all snap switch units are not adjustable in the field. The 'MD' models were created to provide a 150 control with factory settings to compensate for the narrowing of setpoints on new and existing installations.

On 'MD' models the distance between pump off and burner off is increased by approximately  $\frac{7}{16}$ ". Note that the pump on/off differential on both standard and 'MD' models is set at  $\frac{3}{4}$ ".

This larger differential is accomplished by lowering the burner off setpoint  $\frac{3}{8}$ " below the casting line on 'MD' models when setting the burner on/off points at 150 psi. This compensates for the narrowing of the setpoints at lower operating pressures because the burner off point will move upward (closer to the casting line) at lower pressures.

### Operating Levels Series 150/157 & Series 150S/157S

# Boiler Controls

## Low Water Cut-Offs – Mechanical For Steam Boilers

### Series 1575

#### Low Water Cut-Off/Pump Controllers

- Primary low water fuel cut-off protection and pump control for commercial and industrial steam boilers
- Motorized valve controller, low water cut-off and alarm actuator for boilers, vessels and tanks
- Set points and differential remain constant throughout pressure range
- Diagnostic features incorporated in the control include:
  - High ambient temperature protection
  - Internal LEDs that indicate water position and condition
  - External LEDs that indicate control activity
- Adjustable pump differentials by cutting probes to desired set points
- Control unit mounted remotely from probe chamber for maximum flexibility
- Adjustable 60-second burner-off time delay
- 1 HP burner and pump relays
- Solid state operation
- Redundant low-water and pump-off circuitry
- 60,000 ohms probe sensitivity
- Test button to quickly confirm proper operation
- Probe chamber with 3 probes and gauge glass tappings
- 4th probe can be added for high water control
- NEMA1 electrical control unit enclosure
- NEMA4X probe chamber enclosure
- Maximum ambient temperature 135°F (57°C)
- Maximum water temperature 406°F (208°C) at probes
- Maximum water pressure of 250 psi (17.3 kg/cm<sup>2</sup>)

## Low Water Cut-Offs – Mechanical Combination Low Water Cut-Off/Pump Controllers for Steam Boilers

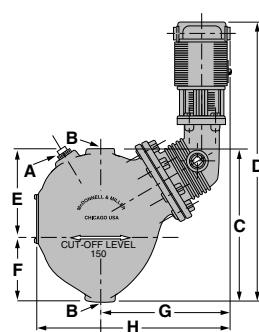

### Series 93

#### Low Water Cut-Off/Pump Controllers

- For commercial and industrial low or high pressure steam boilers
- Maintains consistent water level regardless of pressure
- For boilers of any steaming capacity
- No. 5 Switch included
- Magnetic repulsion eliminates need for bellows
- Optional features
  - Manual reset
  - 7B switch (135ohm proportional control signal) to maintain constant boiler water level
  - 1" NPT connections
  - Maximum pressure 150 psi (10.5 kg/cm<sup>2</sup>)
